About Me

As a student of software engineering, I have a great interest for developing creative software solutions that boost company performance by increasing productivity and effectiveness.I provide important leadership abilities with a track record of inspiring, motivating, and educating teams to any endeavor. I am a diligent and adaptable person with strong internal motivation and a positive outlook. I can work well with others because of my strong interpersonal and communication abilities.

Education Background

- **A/Niwaththakachecthiya National Collage**
  2009 - 2017

- **BSc. Special (Hons) Information Technology at SLIIT**
  Specialization - Software Engineering

Projects

- **YO-WAY App solution idea for Economic Crisis (Android - Kotlin)**

  There are two main stakeholders involved in this smartphone application. Company and User are them. Users and businesses can both register for the app. After registering with the app, businesses may post job openings for us to see and apply for by uploading their CVs. After applying for a job, an employer can access the applicant's information. I completed all the tasks.

CERTIFICATIONS

- **Meta Front -End Developer Professional Certificate (Reading)**

  Nine courses make up the full program for the Meta Frontend Development Professional Certificate on Coursera. Important subjects including HTML, CSS, JavaScript, React, and version control are covered. With the help of this certificate, learners will have the abilities and information necessary to succeed in the frontend development industry.

- **Introduction to Android Mobile Application Development (Reading)**

  A comprehensive program with 12 courses makes up the Meta Android Developer Professional Certificate on Coursera. It covers crucial subjects including version control, Advanced Kotlin, ReactNative, and UI/UX Principles. With the help of this certificate, students will have the abilities and information necessary to succeed in the field of Android programming.
